

Rhiannon Black

Entry-level IT Support professional with 3+ years of experience troubleshooting hardware, software, and networking issues for small businesses. Experienced in customer support, web development, and technical problem-solving. Comfortable working with HTML, CSS, JavaScript, Python, Rust, SQL, and AWS. Seeking a remote IT Support or Help Desk position where I can continue growing my technical skills while providing exceptional customer support.

Dedicated Projects

WhiskerWatch - *Full Stack Web Application*

- Designed and developed a responsive pet wellness platform using Rust, JavaScript, HTML, CSS, Vue, and SQLite.
- Built user authentication, pet profiles, and health tracking features.
- Integrated backend database for persistent user and pet data.
- Designed the UI/UX with a mobile-first approach using Figma.
- Currently expanding platform with gamification and social networking features.

Experience

RB Entertainment, Tampa, FL - *Founder & Operations Manager*

September 2023 - Present

- Manages day-to-day business operations, serving multiple clients simultaneously.
- Coordinates scheduling, customer communication, contracts, and event / appointment logistics using Microsoft Office and cloud-based software.
- Handles troubleshooting of technical and equipment-related issues.
- Builds user friendly web platforms to encourage customer engagement.

TechProven, Cape Coral, FL - *IT Support / Software Developer*

Part-Time / Contract, July 2022 - Present

- Diagnosed and resolved Windows, macOS, and software-related issues for business clients.
- Installed, configured, and maintained software.
- Assisted users with connectivity, account, and application troubleshooting.
- Built and maintained web applications using HTML, CSS, JavaScript, Vue, Python, and Rust.
- Worked with SQLite databases and Git-based workflows.
